

Dermatology Webinar #1

Dermatology E/M Documentation & Coding Recording of live event

Presenter: Karl M. Ellzey, founder & President of Ellzey Coding Solutions

Date of Recording:

Recorded Live on June 28, 2017

View the on-demand recording of the actual live event (up to one year) and receive the webinar handout and training materials!

Who should attend?

This webinar is perfect for **all staff** including: providers, billing staff, practice administrators, nursing staff, medical assistants, and compliance officers!

Program Description:

You may think you know everything there is about E/M documentation and coding. Chances are, much of it is incorrect, medically unnecessary, and setting you up for audit failure! We'll go over all of the essentials plus all of the problems we see on a regular basis when we review client records. Even those with state-of-the-art EHR/EMRs are making crucial mistakes. There are so many misconceptions and bad habits out there; you need to attend this webinar.

Most E/M visits we see are coded too high and documentation is iffy, at best. We'll walk you through it all and show you how to choose accurately a level of care based on what was documented and what was required for the visit! You don't want to miss this webinar to make sure your coding and documentation is accurate and up-to-snuff.

Webinar topics:

- New vs. Established patients (99201-99205 & 99211-99215)
- Effects of groups and multi-specialty groups on E/M billing
- Everything you are doing **WRONG** setting you up for improper coding and audits
- In-depth review of three key components (History, Exam, MDM)
- Medical necessity - are your old habits and EHR costing you time and money?
- HPI and ROS... the two biggest history documentation **failures**. We'll make it easy!
- Medical Decision Making **POINTS** system explained - accurate MDM selection isn't that hard
- Why it's difficult for Dermatologists to meet 99204/99205/99215!
- EMR/EHR pitfalls
- "Nurse" visits - 99211 explained
- Putting it all together and accurately determining a billable E/M code
- Detailed real-world examples throughout the webinar
